Reading a Diagram

Directions: Study the diagram below of the earth's landforms and water bodies. Then, write the correct land or water feature next to each description.

1. a narrow waterway connecting two larger bodies of water _____
2. a broad and flat or gently rolling area where there are few changes in the landscape _____
3. a stretch of low land lying between hills or mountains and usually having a river or stream flowing through it _____
4. a long, narrow valley between cliffs, often with a stream flowing through it _____
5. a natural stream of water larger than a creek and emptying into an ocean, lake, or river _____
6. a land area almost entirely surrounded by water _____
7. a deposit of sand and soil formed at the mouth of some rivers _____
8. a landmass, not as large as a continent, surrounded by water _____
9. an inland body of water, usually fresh water, larger than a pool or a pond _____
10. a group or a chain of islands _____
