

PUBLIC NOTICE

**GEARY PARENTS, STUDENTS, SCHOOL PERSONNEL, CONTRACTORS,
AND PATRONS**

Please be advised that asbestos inspections have been conducted in all local school facilities and Management Plans developed in accordance with federal and state regulations are on file for your review. There is no need for asbestos removal at this time.

Every six months our buildings are visually surveyed to see if their condition has changed. If a negative change is noted, proper steps will be taken to ensure the safety of all students, employees, and other occupants. Visual surveys will be re-conducted within six months of the above date, or as otherwise required by state or federal regulation.

The Geary Public Schools Asbestos Management Plan (A.H.E.R.A.) is available for review in all administrative offices.
